

## 2021 Vice President Report

This year has been difficult for many reasons, mostly resulting from lockdowns and the uncertainty while making plans. Despite this we did get some racing in, even if it wasn't as much as we would have liked. We even ran a Come and Try Day that was successful in terms of introducing new people to our sport and even firing up the enthusiasm of some who may have drifted away from sidecar racing.

The facility at Marulan is great for a Come and Try Day, but not really suitable for racing. That might change when the extension opens up, and may give us another race track. If the doom and gloom stories about Wakefield eventuate, this might be more important than it is now.

The inability to hold regular club meetings has made further difficulties for the club and hopefully this can be resolved soon.

The PCRA calendar for next year looks good, and if we get more of the sidecars out that are hiding in sheds, either with new teams, or older teams returning, the meetings would be that much better, as everyone would have someone to play with on track.

I hope everybody has a safe and a happy Christmas and hope everyone can get to see their family members that they have been missing, and can avoid the family members who are best avoided.

Jeff Brown

ALMCC Vice President
